

Making Adaptations to Mathematics in Years 1 & 2

Course Details

Date: 14th November 2024

Venue: Online (Zoom)

Time: 13:15-14:45

Cost: £60

Course Leader: Vanessa Brown

Overview of Training:

This 90-minute online session will allow teachers to consider strategies for making appropriate adaptations to mathematics lessons in KS1 so that learners can master important concepts and experience success.

This CPD will explore what it means to move from differentiation to adaptive teaching and how to adjust teaching to better match the needs of each individual learner.

Course Content

- Moving from differentiation to adaptive teaching;
- How exactly can we adapt lessons?
- Maintaining high expectations for all;
- Identifying potential barriers to learning;
- Providing targeted support to increase success;
- Using assessment information to inform planning;
- Making in-the-moment adaptations.

This CPD opportunity would be suitable for new and experienced teachers and TAs in KS1 as well as subject leaders of mathematics.

Bookings can be made by visiting www.teachcr.com/mathematics or by contacting enquiries@teachcr.com
