

## Using Numicon as a Problem-Solving Tool in KS2

### Course Information

**Date:** 22<sup>nd</sup> January 2024

**Venue:** Online (Zoom)

**Time:** 16:00-17:15

**Cost:** £40

**Course Leader:** Vanessa Brown

### Overview of Training:

Numicon is a great tool for calculating but this online twilight session explores how Numicon can be used as a tool for problem-solving in KS2.

The use of Numicon supports pupils to become more confident mathematicians, exposing the structure of the mathematics being considered and enables pupils to reason and problem solve.

This CPD opportunity would be suitable for new and experienced teachers and Teaching Assistants in KS2 as well as subject leaders of mathematics.

### Course Objectives:

- To explore how Numicon can be used to make sense of mathematical structures;
- To experience activities that allow learners to express themselves mathematically using manipulatives in problem solving situations.
