

Promoting a Problem-Solving Classroom in Years 1 & 2

Course Details

Date: 22nd January 2024

Venue: Online (Zoom)

Time: 9:15-11:45

Cost: £60 per delegate

Course Leader: Vanessa Brown

Course Overview

Problem solving is more than just word problems. During the training, we will explore a range of types of problems and examine the skills needed to be a successful problem solver in mathematics. There will be the opportunity to consider what it means to be 'stuck' and how we can support children and give strategies for them to come to terms with this.

Aims

- to gain a greater understanding of how problem solving might look in Years 1 and 2.
- to explore strategies in which simple problems can be supported, developed and extended.

This course is suitable for Year 1 and 2 teachers and teaching assistants looking to get to grips with problem solving in their classroom.

Bookings can be made at www.teachcr.com or by contacting enquiries@teachcr.com
